HELCOR STEEL PIPES

Product name:	HELCOR
Diameter:	1000mm
Product description:	Helically corrugated steel pipe
Material specification:	Galvanized steel plate in accordance with EN 10326 or EN 10327
Thickness of steel plates:	2,0mm
Corrosion protection:	zinc coating 600 g/m ² or 1000 g/m ²
Corrugation:	125x26mm

Description:

HELCOR pipe is produced to be used for water transportation road culverts, and it is resistant to aggressive water and ground conditions.

The pipe can be used for every class of road and all kinds of live loads.

The pipe fulfils the requirements of the National Polish, Swedish, Czech, Austrian, Norwegian Board of Roads and National Railway.

ViaCon Poland guarantees that the pipe will perform satisfactory in the ground if proper compaction of the backfilling material around the pipe is done.
